

Javier Bryan

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Experienced **Software Engineer** leveraging deep technical expertise in software development and artificial intelligence to drive development of digital products.

EXPERIENCE

Senior Software Engineer

Management Control Systems Limited

Present

- Lead development teams ensuring technical alignment with evolving product requirements and delivery of high quality software.
- Design, build, test, deploy, monitor and maintain various fintech solutions for local and international markets enabling domestic fund transfer and cross-border remittances.

Senior Software Engineer

Major Financial Services Institution

- Optimize resource utilization for high-throughput micro-services, achieving a 50% reduction in memory footprint via intensive profiling and heap analysis; enabled higher pod density per node and reduced infrastructure overhead.
- Engineer performance testing suites to simulate peak-load scenarios, identifying and resolving critical bottlenecks prior to production deployment across teams.

Software Engineer

Speur Professional Services

July 2020

- Collaborated with product development team to plan, design, prototype, develop, test and deliver full-stack e-commerce web applications.

EDUCATION

B.Sc. in Electronics and Computer Science

University of the West Indies

First Class Honors, 2018 - 2021
